EXPERIENCE

Tyde Software | Founder & Lead Developer | Long Beach, CA

April 2021 – Present

- Provided excellent service to our clients by creating software solutions to meet their business needs.
- Managed public relations and marketing through our website and social media.

CSULB Undergrad. Research Opportunity Program | Research Assistant | Long Beach, CA

Jan. 2021 – May 2021

- Conducted innovative computer vision research with a faculty member and PhD students by annotating training data for the computer vision model.

Google Developer Student Club | Full Stack Developer | Long Beach, CA

Nov. 2020 – Present

- Applied Google's front and back-end libraries, Flutter and Firebase, to design different aspects of various club projects.
- Maintained project version control with GitHub with a team of engineers.

PROJECTS

Monitoring Driving Behaviors and Emotions | Research Assistant | CSULB Undergrad. Research Opportunity Program

Purpose: To develop a semi-automated approach to understanding the effects of environmental factors on a driver's behavior and emotions.

- Assisted the faculty lead by annotating training data for the computer vision model.

Gro | Full Stack Developer | BeachHacks 2021 | [Link](#)

Purpose: An application to help users keep track of their plant care needs.

Utilized: Flutter, Dart, Firebase, and the trefle.io API.

- Created and implemented a database, user authentication, the trefle.io API, and designed front-end aesthetics.

Journey | Front End Developer | MarinaHacks 2021 (Winning Project) | [Link](#)

Purpose: Designed to help users keep track of their moods and thoughts, while giving them calming music to listen to.

Utilized: Flutter, Dart, YouTube API, and a JSON API.

- Designed and implemented the aesthetics for all the user views and implemented the quote-of-the-day API.
